

APPROVED DRONE SHOW OPERATORS **(SWARM OPERATIONS)**

The organizations listed below are approved by the Bermuda Civil Aviation Authority to conduct Drone Shows (Swarm Operations) throughout the territory of Bermuda. The approval permits the operator to conduct coordinated swarm flights for entertainment purposes, provided they comply with all safety, operational, and notification requirements established by the Bermuda Civil Aviation Authority.

Generally, these operations do not necessitate the designation of restricted airspace, provided that the operators adhere to all pertinent regulations. However, for large community events, the implementation of restricted areas may be enforced to enhance public safety and mitigate the risk of collision with other non-participating unmanned aircraft.

This list is current as of **17 October 2025**. In general, drone shows:

- Must be conducted with a horizontal separation of at least 100 feet from any spectators.
- Do not fly higher than 400 feet above the surface without the permission of the BCAA.
- Must not be conducted directly over spectators.
